MARKET PULSE — Mid-Week Trading Report

Wednesday 17 June 2026

OUTLOOK · NEUTRAL-BEARISH**MACRO THEME**

Warsh's first FOMC at 18:00 GMT today — hold 97% priced, dot plot and easing bias removal are the battleground. RBA paused unanimously Jun 16 at 4.35% after 3 consecutive hikes — AUD soft. US30 at new ATH 52,190 while NAS100 printed a distribution candle below broken support 30,001. Gold pre-FOMC short-covering bounce exhausted at 4,369. UK CPI May Thursday is the next post-FOMC catalyst.

OVERVIEW

Pre-FOMC positioning bifurcated the tape. US30 printed a new all-time high at 52,190 Tuesday (value/industrial holding) while NAS100 reversed sharply -1.89% from 30,560 to 29,968 with a textbook distribution candle — broken support 30,001 confirmed as resistance. RBA voted unanimously to hold at 4.35% on June 16, first pause after three consecutive 25bp hikes; AUD softened to 0.7062. Gold bounced +7.7% from 4,031 low on short-covering to 4,348, stalling at 4,369 intraday high. Silver recovered from 63.88 to 69.96. GBPCAD holds above broken-resistance-now-support 1.8721, watching UK CPI May Thursday for the next catalyst. FOMC today at 18:00 GMT is the dominant event for the entire 7-instrument basket.

TOP CONVICTION TRADES

#1 **XAUUSD** **SHORT**

ENTRY	TARGET	STOP
4,350-4,380	4,150	4,430

Pre-FOMC short-covering bounce +7.7% from 4,031 exhausted at today's intraday high 4,369. Warsh's first FOMC at 18:00 GMT: hawkish hold with dot plot shift is base case (55%). Easing bias removal + 2026 hike signaled = real yields rise = gold reverses below 4,300. 4,300 flips back from conditional support to resistance immediately on hawkish statement. Stop 4,430 above resistance cluster. Risk-reward 1:2.5. Size conservatively — neutral FOMC (30%) extends gold to 4,450, hitting stop.

#2 **NAS100** **SHORT**

ENTRY	TARGET	STOP
30,050-30,200	29,221	30,450

Tuesday distribution candle (open 30,455, high 30,560, close 29,968) with broken support 30,001 confirmed as resistance is the primary signal. FOMC hawkish (base case): tech multiple compression; NAS100 tests 29,446-29,221. Sell any bounce to 30,050-30,200 — the retest of broken support 30,001 as resistance. Stop above 30,450 (above Tuesday open, the distribution failure point). Do not enter below 29,800 without a clear bounce first. Risk-reward 1:2.4.

#3 **GBPCAD** **LONG**

ENTRY	TARGET	STOP
1.8750-1.8780	1.8915	1.8700

Structural break above 1.8702 confirmed Jun 12. Broken resistance 1.8721 now holding as support — three consecutive closes above 1.8750. BoC in dovish hold with Canada in technical recession. BoE hawkish at 3.75%. UK CPI May Thursday Jun 18 is the catalyst: hot = squeeze to year high 1.8915. FOMC hawkish today = risk-off tends to weaken commodity CAD more than GBP = additional tailwind. Stop below breakout zone at 1.8700. Risk-reward 1:2.1.

ANALYSIS

Price action: US30 gapped up +1.62% Monday to 51,671 on pre-FOMC relief, then extended to new all-time high 52,190 on Tuesday (+0.64% session) while NAS100 reversed. Value/industrial composition (Dow) is less multiple-sensitive than NAS100; sector rotation into defensive industrials/financials pre-FOMC. 51,671 support intact. Fundamentals: FOMC hold consensus. NFP +172K, unemployment 4.3%, Q1 earnings solid. Outlook: 3-day NEUTRAL. Too binary to position directionally. Hawkish hold = pullback to 51,671 floor (buy that dip). Neutral hold = extend above 52,190. Key read post-FOMC: close below 51,671 = distribution; close above = ATH continuation.

Broken support 30,001 confirmed as resistance — close at 29,968 is the confirmation print. Bearish engulfing/shooting-star structure at 30,001 is the primary technical signal. Fundamentals: Tech multiples most rate-sensitive of 7 instruments. CPI 4.2%, hawkish Warsh = multiple compression. No mega-cap catalyst post-NVDA. Outlook: NEUTRAL-BEARISH. Sell bounce to 30,050-30,200 stop 30,450 target 29,221. FOMC hawkish = 29,446-29,221 test.

RBA voted unanimously to hold at 4.35% Jun 16 — first pause after three consecutive hikes. Unanimous vote is more dovish than a split decision; AUD tailwind from active hiking cycle removed. Fundamentals: Next RBA meeting Aug 10-11. Major banks divided on next move. FOMC hawkish base case = USD strength presses pair to 0.6994-0.6980. Iron ore stable. Outlook: NEUTRAL-BEARISH.
