MARKET PULSE — Weekly Trading Report

Sunday 30 August 2026

OUTLOOK · NEUTRAL

MACRO THEME

Fed Chair Warsh's hawkish Jackson Hole debut transforms September FOMC into a live meeting; price stability declared 'predominant focus.' Gold crushed 3.7% as debasement trade unwinds. NVDA beat (\$96.22B) keeps AI bid intact. Equities resilient but breadth narrow — Russell 2000 -1.5%.

OVERVIEW

The week ending 28 August was defined by a violent collision between the AI trade and a hawkish Fed reality check. NVDA delivered a standout quarter (\$96.22B revenue, ~70% annual growth guide) that sent the stock up 8.7% and kept the Nasdaq positive. But Warsh's Jackson Hole address on Friday — declaring price stability the Fed's 'predominant focus' and keeping rate hikes on the table — shattered the precious-metals debasement trade and sent gold crashing from 4,688 to 4,495 intraday. Equities held up (Dow +0.53%, S&P +0.49%, Nasdaq +0.85%) but breadth was terrifyingly narrow with the Russell 2000 falling 1.5%. Core PCE printed 3.3% YoY — sticky above target. The week ahead is dominated by ISM PMIs, Broadcom earnings, BoC/RBNZ rate decisions, and the August employment report on Friday.

TOP CONVICTION TRADES

#1 **XAUUSD** **SHORT**

ENTRY	TARGET	STOP
4,580-4,620	4,400	4,680

Warsh declared price stability the Fed's predominant focus and explicitly kept rate hikes on the table. Debasement trade thesis shattered in a single session. Broken support at 4,630 now firm resistance. NFP Friday could add further USD strength. Risk-reward 1:2.5 — asymmetric with macro wind at back.

#2 **GER40** **LONG**

ENTRY	TARGET	STOP
26,400-26,500	26,800	26,200

Six-session winning streak culminating in fresh ATH at 26,618.74 on Friday. ECB policy vacuum allows momentum to carry. Eurozone resilience despite global headwinds. Breakout above 26,500 technically significant. Risk-reward 1:2. Cleanest directional setup in basket.

#3 **NAS100** **SHORT**

ENTRY	TARGET	STOP
29,800-30,000	28,800	30,200

30,000 broken support confirmed as resistance — NAS100 has failed to reclaim this level since Aug selloff. Warsh hawkish raises discount rate for growth equities. Broadcom earnings Wednesday could disappoint. NVDA beat provides floor but upside limited. Risk-reward 1:2.5.
