MARKET PULSE — Weekly Trading Report

Sunday 04 October 2026

OUTLOOK · NEUTRAL-BULLISH

MACRO THEME

Massive NFP miss (+29K vs ~90K expected) collapses October Fed hike odds to ~20%, sending Nasdaq to a record close. But the 10Y yield holds at 5.28% and gold continues its correction from 5,586 ATH. AI concentration drives the rally while Dow, small-caps, and commodities struggle.

OVERVIEW

The September jobs report was a bombshell that flipped the market narrative: payrolls +29K against ~90K expected, unemployment 4.2%, prior months revised down 60K. October hike odds collapsed from ~60% to ~20%. The 'bad news is good news' dynamic sent the Nasdaq to a record 30,807.93 while the Dow fell 1.26% on the week. The 10Y Treasury yield hit 5.34% Thursday before retreating to 5.28% on the NFP print. Gold sold off despite rate relief — a deeply bearish signal. WTI crude eased to \$91.11 on a G7 emergency reserve release. Treasury auctions (\$119B total Tue-Thu), FOMC minutes Wednesday, and ISM Services Monday are the immediate catalysts. The midterm elections on November 3 loom as the next major risk event.

TOP CONVICTION TRADES

#1 NAS100 LONG		
ENTRY	TARGET	STOP
30,500-30,650	31,500	30,100
Strongest signal (+65) in the basket. October hike odds collapsed to ~20% on NFP miss — removes immediate valuation headwind for long-duration tech. AI capex narrative intact with Micron record results. New ATH 31,017.53 confirms price discovery. Buy dips into prior breakout retest. Risk: Treasury auctions Tue-Thu could spike yields back above 5.34%. R:R ~1:2.5.		
#2 XAUUSD SHORT		
ENTRY	TARGET	STOP
4,200-4,220	4,050	4,280
Gold sold off on the NFP miss — the single most bearish signal possible. When good news for rates cannot lift gold, the trend is deeply entrenched. 10Y at 5.28% makes zero-yield gold uninvestable. Broken supports at 4,321 and 4,400 now firm resistance. Target 4,050 before 4,000 round number. R:R ~1:2.5.		
#3 AUDUSD SHORT		
ENTRY	TARGET	STOP
0.6980-0.7000	0.6880	0.7030
Structural breakdown below 0.7000 confirmed after two weeks of price action. Global growth fears (NFP miss, China weakness per Hang Seng -2.60%) undermine commodity currencies. RBA on hold removes rate-support floor. USD remains firm despite NFP miss. Tight stop above 0.7030 invalidates the breakdown. R:R ~1:2.

ANALYSIS

US30 fell 1.26% on the week as the 10Y yield surge to 5.34% punished rate-sensitive cyclicals. Friday's NFP miss (+29K) sparked a relief rally but the index remains below the 51,936 ceiling. Two consecutive weekly losses. The 50,546 low is the new floor. Treasury auctions Tue-Thu are the immediate catalyst for yields. 3-day bias: NEUTRAL-BULLISH. Buy dips toward 50,800-51,000 stop 50,400 target 51,900.

ANALYSIS

GER40 drifted lower through the fortnight, touching 24,832 on Oct 1 before a sharp Friday bounce (+1.17%) reclaimed 25,000. The bounce was partly G7 oil reserve release relief and short-covering. Structure remains bearish on the weekly but the daily bounce has momentum. 3-day bias: NEUTRAL. Buy above 25,300 stop 25,000 target 25,700. Sell below 25,000 stop 25,300 target 24,500.

ANALYSIS

GBPCAD broke out of its multi-week 1.84-1.88 consolidation range. Oil easing on G7 reserve release (CAD-negative) combined with GBP resilience drove the pair to 1.8892 on Oct 1. Friday close 1.88687 confirms the breakout. 3-day bias: NEUTRAL-BULLISH. Buy dips 1.8800-1.8820 stop 1.8720 target 1.9000. Risk: oil spike on Middle East headlines reverses the trade.

Silver collapsed 10% over the fortnight from 67.149 to 60.415. The selloff was relentless across nine consecutive sessions. Even the NFP miss could not lift silver — it fell another 1.71% on Friday. Gold/silver ratio widened. Industrial demand fears compound the gold-driven correction. 3-day bias: NEUTRAL-BEARISH. Below 60.00 sell target 58.00 stop 61.00.
